

ABOUT US !

SUPERIOR DAY CARE CENTER

"Celebrating Our Children Through Vision"

Superior Day Care Center is a place that has a diverse population and caters to all families. We are conveniently located in the East New York Area of Brooklyn, New York and endeavour to create a safe environment which will foster each child's development in all areas. Teachers will help to nurture each child's emotional and educational needs through unconditional love and emotional security with a sense of opportunity and creativity. Secure relationships with responsive and respectful adults provide the basis for all learning. With these relationships in place, children develop a capacity for trust, competence and independence that helps them grow as students and people.

SUPERIOR DAY CARE CENTER seeks to:

- Provide stimulating, learning programs that will challenge children to reach their full potential and develop self confidence.
- Interacting with children in ways that emphasize and foster attitudes of mutual respect between adults and children.
- Demonstrating respect for all other persons as individuals and appreciation of cultural and ethnic diversity.
- Superior Day Care Center will bring them up, build them up, train their members and send them forth.

OUR PHILOSOPHY

"Our Child Care Philosophy"

"A SUPERIOR START "

At Superior Day Care, we believe each child grows, develops and learns at their own pace, as a result we will nurture such growth and development with educational tools that stimulates critical thinking and problem solving skills. At the foundation of our philosophy are family relationships and security with respectful teachers which, in our opinion, will foster and create a great learning environment. We believe a child's unique interests and self-expressions helps us to create a program geared towards developing our children into productive members of our society and the leaders of tomorrow.

- Aesthetically Beautiful & Clean

PROGRAMS

DESCRIPTION OF ACTIVITIES:

I. INFANTS PROGRAM

The Purpose of this program is to provide infants from 8 weeks to 18 months old, with a healthy and safe environment where infants can begin their growth. Teachers will help develop the child's basic skills and discovery. Focus is placed on communication, both verbal and non-verbal through classroom activities. Through a low child to teacher ratio each child will receive the attention needed. Bonds between teacher parent and infant will be encouraged to produce trusting relationships.

II. TODDLER PROGRAM

The Purpose of this program is to provide safe exploration atmosphere to children ages 12 months to 3 years old. Toddlers are a group of explorers; this program will be geared toward the creative development of a child, as they will be encouraged to try new ways of doing things. Teachers will develop a curriculum influenced by creativity; activities including music, art, singing, circle time and expressions. Teachers will motivate speech development and socialization of toddlers through facilitating classroom activities and daily opportunities.

III. PRE-SCHOOL PROGRAM

The Purpose of this program is to provide opportunities for children to master basic skills for kindergarten while focusing on social and emotional development though learning, creativity and cooperation. The curriculum provides a variety of enriching and stimulating activities. A creative curriculum is also encouraged including activities but not limited to music, language, physical educations, academic skills and creative expression. An emphasis will be placed on the development of self-confidence, curiosity, self-discipline and a positive attitude towards school and learning. A low child to teacher ratios is encouraged to offer children more individualized instruction and better preparation for school.

IV. AFTER-SCHOOL PROGRAMMING

The purpose for this program is to provide working families with children ages 5 to 12 years old a safe and friendly place for their children to attend after public school. We will provide pick-up services. Children will be given a healthy snack prior to homework time. Assistance will be provided for children for the completion of their homework through a mentoring-tutoring program. Extra tutoring sessions will also be available for children if needed. A wider variety of games, movies, crafts and activities will be available upon the completion of their homework.
